Senior Java Developer | AWS & Cloud Specialist

Highly skilled Java Developer with 9 years of experience in backend development, cloud computing, and scalable architectures. Strong expertise in AWS (Lambda, ECS, RDS, S3), microservices, and high-performance financial systems. Specialized in modernizing payment systems, working with Pix, and designing resilient cloud solutions.

AWS Cloud Practitioner certified, currently pursuing AWS Solutions Architect certification. Passionate about leveraging cloud technologies to optimize software performance and security.

Professional Experience

Senior Software Engineer - Itaú Unibanco (2020-Present)

- Developed and maintained Java-based backend services for financial applications.
- Optimized payment systems using AWS (Lambda, ECS, RDS, S3).
- Specialized in PIX and real-time payment processing for 4+ years.
- Led cloud infrastructure management with Terraform and AWS, ensuring scalability and security.
- Collaborated with cross-functional teams using Agile/Scrum to deliver high-performance solutions.

Specific Knowledge Analyst - Everis (2019-2020)

- Led a squad to build a chatbot for a financial institution.
- Designed and integrated transactional flows and microservices.
- Utilized Java, Apache Camel, SQL, microservices, and API development.

Senior Integration Analyst - Indra (2018-2019)

- Built web services using IBM Integration Bus and Apache Camel.
- Worked on an investment platform for a banking client.
- Designed workflows with multiple service integrations for resilience and agility.
- Instructor - Grande Porte Treinamentos (2018)
- Conducted a 3-week corporate training on IBM Integration Bus and SOA.

- Trained teams on integration best practices and contract modeling.

Education

- Bachelor's Degree in Systems Analysis and Development – Universidade Metodista, São Bernardo do Campo, SP (2018)
- Postgraduate in Software Architecture – IGTI, São Paulo, SP (2021)

Certifications

- AWS Cloud Practitioner (Earned)
- AWS Solutions Architect – In Progress

Technical Skills

Programming Languages:

- Java (9+ years), Kotlin, Python, Go, NodeJS

Cloud & Infrastructure:

- AWS (Lambda, ECS, RDS, S3, CloudFormation, Terraform)
- Docker, Kubernetes, CI/CD (Jenkins, Git)

Frameworks & Libraries:

- Spring Boot, Hibernate, Apache Camel

Databases:

- MySQL, PostgreSQL, MongoDB, Redis

Methodologies:

- Agile, Scrum
